# OUR STORY

---

## FRENCH CRAFTSMANSHIP

Meljac is built on two main pillars: heritage and innovation. Our team of dedicated artisans in the Paris region manufacture and finish all Meljac products using traditional methods and high-quality materials. We continually invest in innovative technologies that build on our experience and craftsmanship to create products that are elegant, authentic, and functional.

## A VISION OF BEAUTY

Inspired by the elegance of 1930s design, André Bousquet took a chance on the previously non-existent market of design-conscious electrical hardware. He founded Meljac — named after his hometown in the South of France — in 1995 and designed our first product, the Classique toggle switch. Today Meljac continues to build on Bousquet's vision, crafting timeless hardware for contemporary spaces.

# MELJAC NORTH AMERICA

---

Founded in 2018, Meljac North America is the sole distributor of Meljac in the United States and Canada, with extensive experience working with Meljac products and a close collaborative partnership with Meljac France. Our California-based team works with clients around the country to ensure that Meljac products come with personalized service, attention, and expertise tailored to the needs of our domestic design and integration partners.

# MADE FOR YOU

---

## UNMATCHED PERSONALIZATION

All Meljac products are made-to-order according to client specification.

Our extensive selection of customizable details and finishes and our project-specific manufacturing process ensures Meljac products integrate seamlessly into any space.

# Keypads

CLASSIQUE, DAMIER, & ELLIPSE COLLECTIONS

---

Thoughtful interiors deserve carefully considered wall controls. Meljac's push buttons and toggles provide flexible dimming, scene activation, and shade control for lighting and home automation systems.

# FINISHES

---

## METALLIC FINISHES

Meljac products are finished by hand at our own ateliers near Paris. All metal plates are machined from the highest-quality brass and plated in specialty materials including bronze, copper, nickel and chrome. Surface treatments include hand-brushing, sandblasting and patination. All Meljac products can be ordered in any of our catalog finishes; for large projects custom finishes can be specially crafted.

## FINISH TIERS

Meljac finishes are organized into three tiers: from Tier 1, our base tier, to Tier 3, our premium tier, based on materials and complexity.

FINISHES

---

3 mm | Helvetica

SCREENPRINTED

3 mm | Helvetica

BACKLIT

3 mm | Arial

# PLATE DETAILS

---

## EDGE OPTIONS

Choose between a straight or beveled plate edge to match your style.

## SCREW OPTIONS

Visible screws on the plate offer a more industrial look while hidden screws provide a clean aesthetic.

# SPECIFICATION + PURCHASING

---

Contact Meljac North America to purchase Meljac products for use in the United States and Canada. Due to their technical installation requirements, Meljac lighting controls are best purchased through the project's system integrator, who is responsible for installation and programming of the lighting control or home automation system.

# VISIT US

---

Our products are designed with the full sensory experience in mind - the best way to understand them is to have them in your hand. Feel the unique tactile nature of our toggles and push buttons, explore our full selection of handcrafted finishes, and experience dimming and shade control options with our interactive display wall, powered and illuminated by our partners Crestron Home, Delta Lighting and RBW.
